## Grade 3 Report Card Rubrics Mathematics

## Operations and Algebraic Thinking

| Represents and solves problems involving multiplication and division (3.OA.1, 3.OA.2, 3.OA.3, 3.OA.4) |  |  |  |  |
| :---: | :--- | :--- | :--- | :--- |
| $\begin{array}{c}\text { Marking } \\ \text { Period }\end{array}$ | 1 | 2 | 4 |  |
| 1 |  |  |  |  |
| 2 | $\begin{array}{l}\text { Not yet able to } \\ \text { interpret, model and } \\ \text { solve problems } \\ \text { involving } \\ \text { multiplication and } \\ \text { division within 100. }\end{array}$ | $\begin{array}{l}\text { Requires teacher } \\ \text { prompting and support } \\ \text { to interpret, model and } \\ \text { solve problems } \\ \text { involving multiplication } \\ \text { and division within 100. }\end{array}$ | $\begin{array}{l}\text { Consistently and } \\ \text { independently } \\ \text { interprets models } \\ \text { and solves problems } \\ \text { involving } \\ \text { multiplication and } \\ \text { division within 100. }\end{array}$ | $\begin{array}{l}\text { Meets all the criteria } \\ \text { for a 3 and selects } \\ \text { multiple strategies to } \\ \text { solve multiplication } \\ \text { and division problems } \\ \text { and is able to } \\ \text { construct viable }\end{array}$ |
| arguments to explain |  |  |  |  |$\}$

Understands properties of multiplication and the relationship between multiplication and division. (3.OA.5,
3.OA.6)

| Marking Period | 1 | 2 | 3 | 4 |
| :---: | :---: | :---: | :---: | :---: |
| 1 |  |  |  |  |
| 2 | Not yet able to do the following: <br> *Apply the properties of operations as strategies for multiplication and division; <br> *Use the Commutative, Associative and Distributive properties of multiplication to solve problems; <br> *Understand division as an unknown-factor problem; <br> *Relates multiplication and division fact families for multiples within 100. | Requires teacher prompting and support to do the following: <br> *Apply the properties of operations as strategies for multiplication and division; <br> *Use the Commutative, Associative and Distributive properties of multiplication to solve problems; <br> *Understand division as an unknown-factor problem; <br> *Relates multiplication and division fact families for multiples within 100. | Consistently and independently does the following: <br> *Applies the properties of operations as strategies for multiplication and division; <br> *Uses the Commutative, Associative and Distributive properties of multiplication to solve problems; *Understands division as an unknown-factor problem; <br> *Relates multiplication and division fact families for multiples within 100. | Extends criteria from a 3 to include fact families through 12. |
| 3 | Not yet able to do the following in real-world one- and two-step problems related to measurement:: <br> *Apply the properties of operations as strategies for multiplication and division; <br> *Use the Commutative, Associative and Distributive properties of multiplication to solve problems; <br> *Understand division as an unknown-factor problem; <br> *Relates multiplication and division fact families for multiples within 100. | Requires teacher prompting and support to do the following in realworld one- and two-step problems related to measurement: <br> *Apply the properties of operations as strategies for multiplication and division; <br> *Use the Commutative, Associative and Distributive properties of multiplication to solve problems; <br> *Understand division as an unknown-factor problem; <br> *Relates multiplication and division fact families for multiples within 100. | Consistently and independently does the following in real-world one- and two-step problems related to measurement: <br> *Applies the properties of operations as strategies for multiplication and division; <br> *Uses the Commutative, Associative and Distributive properties of multiplication to solve problems; *Understands division as an unknown-factor problem; <br> *Relates multiplication and division fact families for multiples within 100. | Extends criteria from a 3 to include fact families through 12. |

| Multiplies and divides within 100. (3.OA.7) * |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Marking Period | 1 | 2 | 3 | 4 |
| 1 | Not yet able to recall multiplication and division facts within 100 in a timely manner. | Requires teacher prompting and support, as well as manipulatives, to recall multiplication and division facts within 100 from memory, in a timely manner. | Consistently and independently able to recall multiplication and division facts within 100 from memory, in a timely manner. | With complete accuracy, able to fluently recall multiplication and division facts within 100 from memory. |
| 2 | Not yet able to recall multiplication and division facts within 100 in a timely manner. | Requires teacher prompting and support, as well as manipulatives, to recall multiplication and division facts within 100 from memory, in a timely manner. | Consistently and independently able to recall multiplication and division facts within 100 from memory, in a timely manner. | With complete accuracy, able to fluently recall multiplication and division facts within 100 from memory. |
| 3 | Not yet able to recall multiplication and division facts within 100 in a timely manner. | Requires teacher prompting and support, as well as manipulatives, to recall multiplication and division facts within 100 from memory, in a timely manner. | Consistently and independently able to recall multiplication and division facts within 100 from memory, in a timely manner. | With complete accuracy, able to fluently recall multiplication and division facts within 100 from memory. |

*As measured by the benchmark fluency assessments

Solves problems involving the four operations and identifies and explains patterns in arithmetic (3.OA.8, 3.OA.9)

| Marking Period | 1 | 2 | 3 | 4 |
| :---: | :---: | :---: | :---: | :---: |
| 1 |  |  |  |  |
| 2 | Not yet able to: <br> *Represents one and two-step word problems with equations using letters for unknowns; *Solves one- and twostep word problems involving all four operations; <br> *Assesses reasonableness of answers using estimation and mental math; <br> *Identifies patterns (including those in addition and multiplication tables); <br> * Explains the rule for generating a pattern. | Requires teacher prompting and support to do each of the following: <br> *Represents one- and twostep word problems with equations using letters for unknowns; <br> *Solves one- and two-step word problems involving all four operations; <br> *Assesses reasonableness of answers using estimation and mental math; *Identifies patterns (including those in addition and multiplication tables); <br> * Explains the rule for generating a pattern. | Consistently and independently does each of the following: <br> *Represents one- and twostep word problems with equations using letters for unknowns; <br> *Solves one- and two-step word problems involving all four operations; <br> *Assesses reasonableness of answers using estimation and mental math; <br> *Identifies patterns (including those in addition and multiplication tables); *Explains the rule for generating a pattern. | Meets the criteria for a 3, creates two-step word problems, explains why the order of steps is important in solving a twostep problem, and develops a function rule to represent a pattern. |
| 3 | Reassess as needed |  |  |  |

## Numbers and Operations in Base Ten

| Uses place value understanding and properties of operations to perform multi-digit arithmetic. (3.NBT.1, <br> 3.NBT.2, 3.NBT.3) |  |  |  |  |
| :---: | :--- | :--- | :--- | :--- |
| Marking <br> Period | 1 | 2 | 4 |  |
| 1 | Not yet able to : <br> *Understand number <br> value to round whole <br> numbers; <br> *Fluently add and <br> subtract within ten <br> thousand. | Requires teacher <br> prompting and support <br> to: *Understand number <br> value to round whole <br> numbers; <br> *Fluently add and <br> subtract within ten <br> thousand. | Consistently and <br> independently uses place <br> value understanding to: <br> *Understand number <br> value to round whole <br> numbers; <br> *Fluently add and <br> subtract within ten <br> thousand. | Meets all the <br> and can <br> construct viable <br> arguments to <br> explain answers <br> and critique the <br> reasoning of |
| others. |  |  |  |  |$|$

Numbers and Operations - Fractions

Develops understanding of fractions as numbers (3.NF.1, 3.NF.2, 3.NF.3)

| Marking <br> Period | 1 | 2 | 3 |  |
| :---: | :--- | :--- | :--- | :--- |
| 1 |  |  | 4 |  |
| 2 | Not yet able to: <br> *Model and <br> interprets unit <br> fractions and uses <br> unit fractions to <br> understand fractions <br> as parts of a whole; <br> *Represent fractions <br> on a number line. <br> *Compare fractions <br> by their size; <br> *Explain equivalence <br> of fractions. | Requires teacher <br> prompting and support <br> to: <br> *Model and interprets <br> unit fractions and uses <br> unit fractions to <br> understand fractions as <br> parts of a whole; <br> *Represent fractions on <br> a number line. <br> *Compare fractions by <br> their size; <br> *Explain equivalence of <br> fractions. | Consistently and <br> independently: <br> *Models and interprets <br> unit fractions and uses <br> unit fractions to <br> understand fractions as <br> parts of a whole; <br> *Represents fractions on <br> a number line. <br> *Compares fractions by <br> their size; <br> *Explains equivalence <br> of fractions. | Exceeds all the <br> criteria for a 3. |
| 3 | Not yet able to: <br> *Model and interpret <br> unit fractions and use <br> unit fractions to <br> understand fractions <br> as parts of a whole; <br> *Represent fractions <br> on a number line. | Requires teacher <br> prompting and support <br> to: <br> *Model and interpret <br> unit fractions and use <br> unit fractions to <br> understand fractions as <br> parts of a whole; <br> *Represent fractions on <br> a number line. | Consistently and <br> independently: <br> *Models and interprets <br> unit fractions and uses <br> unit fractions to <br> understand fractions as <br> parts of a whole; <br> *Represents fractions on <br> a number line. | Meets all the <br> criteria for a 3 and <br> can use models to <br> explain the <br> relationship <br> between improper <br> fractions and mixed <br> numbers. |

## Measurement and Data

| Solves problems involving measurement and estimation of intervals of time, liquid volumes, and masses of objects. (3.MD.1, 3.MD.2) |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Marking Period | 1 | 2 | 3 | 4 |
| 1 |  |  |  |  |
| 2 |  |  |  |  |
| 3 | Not yet able to do each of the following: <br> *Tell time to the nearest minute; <br> *Measure and/or estimates time intervals in minutes, liquid volumes, and masses of objects; <br> *Solve word problems involving addition and subtraction of time intervals in minutes, liquid volumes, and masses of objects. | Requires teacher prompting and support to do each of the following: <br> *Tell time to the nearest minute; <br> *Measure and/or estimates time intervals in minutes, liquid volumes, and masses of objects; <br> *Solve word problems involving addition and subtraction of time intervals in minutes, liquid volumes, and masses of objects. | Consistently and independently does each of the following: <br> *Tell time to the nearest minute; <br> *Measure and/or estimates time intervals in minutes, liquid volumes, and masses of objects; <br> *Solve word problems involving addition and subtraction of time intervals in minutes, liquid volumes, and masses of objects. | Selects multiple strategies to create and solve word problems involving time intervals, liquid volumes, and masses of objects, and justifies the strategy. |

| Represents and interprets data. (3.MD.3, 3.MD.4) |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Marking Period | 1 | 2 | 3 | 4 |
| 1 |  |  |  |  |
| 2 | Not yet able to do each of the following: <br> *Draw scaled picture and bar graphs with several categories; *Solve one- and twostep "how many" questions based on graphed data; *Generate measurement data by measuring lengths using rulers marked with halves and fourths of an inch; *Show the data by making a line plot, where the horizontal scale is marked off in appropriate unitswhole numbers, halves, or quarters. | Requires teacher prompting and support to do each of the following: <br> *Draw scaled picture and bar graphs with several categories; *Solve one- and twostep "how many" questions based on graphed data; <br> *Generate measurement data by measuring lengths using rulers marked with halves and fourths of an inch; <br> *Show the data by making a line plot, where the horizontal scale is marked off in appropriate unitswhole numbers, halves, or quarters. | Consistently and independently does each of the following: *Draw scaled picture and bar graphs with several categories; *Solve one- and twostep "how many" questions based on graphed data; *Generate measurement data by measuring lengths using rulers marked with halves and fourths of an inch; <br> *Show the data by making a line plot, where the horizontal scale is marked off in appropriate unitswhole numbers, halves, or quarters. | Meets criteria of a 3 also can choose and justify the most appropriate method for displaying a set of data. |

| 3 | Not yet able to do each of the following: *Draw scaled picture and bar graphs with several categories; *Solve one- and twostep "how many" questions based on graphed data; *Generate measurement data by measuring lengths using rulers marked with halves and fourths of an inch; *Show the data by making a line plot, where the horizontal scale is marked off in appropriate unitswhole numbers, halves, or quarters. | Requires teacher prompting and support to do each of the following: <br> *Draw scaled picture and bar graphs with several categories; <br> *Solve one- and twostep "how many" questions based on graphed data; <br> *Generate measurement data by measuring lengths using rulers marked with halves and fourths of an inch; <br> *Show the data by making a line plot, where the horizontal scale is marked off in appropriate unitswhole numbers, halves, or quarters. | Consistently and independently does each of the following: *Draw scaled picture and bar graphs with several categories; *Solve one- and twostep "how many" questions based on graphed data; *Generate measurement data by measuring lengths using rulers marked with halves and fourths of an inch; *Show the data by making a line plot, where the horizontal scale is marked off in appropriate unitswhole numbers, halves, or quarters. | Meets criteria of a 3 also can choose and justify the most appropriate method for displaying a set of data. |
| :---: | :---: | :---: | :---: | :---: |

| Geometric Measurement: Understands concepts of area and relates area to multiplication and to addition. (3.MD.5, 3.MD.6, 3.MD.7) |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Marking Period | 1 | 2 | 3 | 4 |
| 1 |  |  |  |  |
| 2 | Not yet able to: <br> *Calculate the area as an attribute of rectangular arrays; *Determine area of rectangular arrays by counting unit squares and decomposing shapes; <br> *Relate area of rectangular arrays to the operations of multiplication and addition. | Requires teacher prompting and support to do each of the following: <br> *Calculate the area as an attribute of rectangular arrays; <br> *Determine area of rectangular arrays by counting unit squares and decomposing shapes; <br> *Relate area of rectangular arrays to the operations of multiplication and addition. | Consistently and independently does each of the following: *Calculate the area as an attribute of rectangular arrays; *Determine area of rectangular arrays by counting unit squares and decomposing shapes; <br> *Relate area of rectangular arrays to the operations of multiplication and addition. | Meets criteria of a 3 using a variety of strategies and clearly communicates their mathematical thinking to solve problems. |
| 3 | Not yet able to: <br> *Measure area as an attribute of plane figures; <br> *Calculate area by counting unit squares and decomposing regular and irregular shapes when the side lengths are whole or not whole units; <br> *Relate area to the operations of multiplication and addition. | Requires teacher prompting and support to do each of the following: <br> *Measure area as an attribute of plane figures; *Calculate area by counting unit squares and decomposing regular and irregular shapes when the side lengths are whole or not whole units; *Relate area to the operations of multiplication and addition. | Consistently and independently does each of the following: <br> *Measure area as an attribute of plane figures; <br> *Calculate area by counting unit squares and decomposing regular and irregular shapes when the side lengths are whole or not whole units; <br> *Relate area to the operations of multiplication and addition. | Meets criteria of a 3 using a variety of strategies and clearly communicates their mathematical thinking to solve problems. |

Geometric Measurement: Recognizes perimeter as an attribute of plane figures and distinguishes between linear and area measures. (3.MD.8)

| Marking <br> Period | 1 | 2 | 3 |  |
| :---: | :--- | :--- | :--- | :--- |
| 1 |  |  | 4 |  |
| 2 |  |  |  |  |
| 3 | Not yet able to <br> solve real-world <br> problems involving <br> each of the <br> following: <br> *Finding perimeters <br> of polygons; <br> *Finding missing side <br> lengths when given <br> the perimeter; <br> *Creating plain <br> figures with the <br> same area and <br> different perimeters <br> and vice versa. | Requires teacher <br> prompting and <br> support to solve <br> real-world problems <br> involving each of the <br> following: <br> *Finding perimeters <br> of polygons; <br> *Finding missing side <br> lengths when given <br> the perimeter; <br> *Creating plain <br> figures with the <br> same area and <br> different perimeters <br> and vice versa. | Consistently and <br> independently <br> solves real-world <br> problems involving <br> each of the <br> following: <br> *Finding perimeters <br> of polygons; <br> *Finding missing <br> side lengths when <br> given the perimeter; <br> *Creating plain <br> figures with the <br> same area and <br> different perimeters <br> and vice versa. | Meets criteria of a 3 <br> and when given the <br> perimeter of a plain <br> figure can consistently <br> and independently <br> determine the side <br> lengths that will <br> produce the maximum <br> and minimum area and <br> justifies their <br> conclusions with viable <br> arguments. |

## Geometry

| Reasons with shapes and their attributes. (3.G.1, 3.G.2) |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Marking Period | , | 2 | 3 | 4 |
| 1 |  |  |  |  |
| 2 | Not yet able to: *Partition shapes into different areas and associate each part with a unit fraction of a whole. | Requires teacher prompting and support to: <br> *Partition shapes into different areas and associate each part with a unit fraction of a whole. | Consistently and independently: *Partition shapes into different areas and associate each part with a unit fraction of a whole. | Meets criteria for a 3 and can solve realworld problems involving partitioning shapes into different areas and associating each part with a unit fraction of a whole. |
| 3 | Not yet able to: *Classify shapes according to a variety of attributes, name different quadrilaterals and explain why some shapes are quadrilaterals and some are not. | Requires teacher prompting and support to: <br> *Classify shapes according to a variety of attributes, name different quadrilaterals and explain why some shapes are quadrilaterals and some are not. | Consistently and independently: <br> *Classify shapes according to a variety of attributes, name different quadrilaterals and explain why some shapes are quadrilaterals and some are not. | Meets criteria for a 3 and can compare and contrast shapes using proper mathematical vocabulary. |
